Subject Index to Volume 14

N-Acetyleysteine, oral, speeds reversal of cigarette smoke-induced mucous cell hyperplasia in the rat, 19
β-Agonists characterization and comparison of the role on in vivo and in vitro surfactant-related phospholipid synthesis and secretion by fetal rabbit lung and isolated type II alveolar cells, 811
Airway permeability in rats exposed to ozone or treated with cytoskeleton-destabilizing drugs, 501
Alveolar epithelium sublethal hyperoxic injury, 1021
Alveolar macrophages intraphagosomal pH after phagocytosis in vivo and in vitro of fluorescein-labeled yeast particles, 197
Antibody responses after lung immunization, minireview, 133
Antioxidant defenses in rat alveolar macrophages, role of selenium-dependent gluthathione peroxidase, 921
Autonomic innervation of pulmonary artery, evidence for a nonadrenergic noncholinergic inhibitory system, 349

Biotin stores in rodent lungs, localization to Clara and type II alveolar cells, 527
Bronchi, pharmacologic responsiveness in the rat, 575
Bronchioles, pharmacologic responsiveness in the rat, 575
Bronchitis, transition from normal to hypersecretory bronchial mucus in a canine model, changes in yield and composition, 101
Bronchoalveolar fluid in patients with pulmonary sarcoidosis, procoagulant and plasminogen activator activities, 261
Bronchoalveolar lavage cells characterization in pancreatic elastase-induced emphysema in hamsters, 797

Cadmium chloride, effects of aerosol exposures on the clearance of titanium dioxide from the lungs of rats, 491
Cell membranes interaction with oxygen, modification of membrane lipids to enhance pulmonary artery endothelial cell tolerance to hypoxia, 937
Chlorphentermine effects on murine alveolar macrophages, 619
Chrysotile asbestos clearance from human lung, 567
Cigarette smoke:
  acute exposure alters lung eicosanoid and inflammatory cell concentrations in rabbits, 727
  acute exposure in dogs, inflammatory response, 459
  potentiates asbestos-induced airflow abnormalities, 537
Collagens, newly synthesized

in the isolated perfused rat lung, matrix deposition and extracellular processing, 705
Compensatory growth of the lung following partial pneumonectomy, minireview, 157
Corticosteroids effect on lung volume-pressure curves in bleomycin-induced lung injury in the rat, 183
Cyclophosphamide treatment effects in experimental asbestosis, 823

Eglin-c, protease inhibitor, affects superoxide anion release but not bacterial killing, 743
Endotoxin treatment, extension of oxygen tolerance, means to improve its potential therapeutic safety in man, 987
Endotoxin-inducted cytotoxicity attenuation in cultured bovine pulmonary artery endothelial cells by phosphodiesterase inhibition, 637

Fetal lung phospholipids, effect on lactate on glucose incorporation, 121

Gallium uptake, pulmonary, in rats with granulomatosis induced by complete Freund adjuvant, 445
Gas chromatographic method, highly sensitive, does not detect exhalation of volatile hydrocarbons from isolated ventilated lungs under massive peroxidative stress, 387
Goblet cell isolation from cat trachea, a comparison of methods, 375

Human neutrophil elastase: effects on hamster lungs intratracheally administered, an 18-month study, 671
inhibition by bacterial polyanions, 67
inhibition by polyguanylic acid and other synthetic RNA homopolymers, 85
Hypoxia-induced oxygen tolerance, maintenance of endothelial metabolic function, 887

Insulinlike growth factor II (IGF-II) mRNAs during lung development in the rat, 607
Interstitial pneumonitis, pathogenesis of trehalose dimycolate-induced, evidence against roles for immunoglobulins and the complement system, 431

Latex microspheres inhaled by rats and guinea pigs, deposition and retention patterns for 3-, 9-, and 15-μm, 37
Lung injury, patterns of progression and marker of in rodents and subhuman primates exposed to hyperoxia, 869

Macrophage-derived chemoattractant activity characterization in pancreatic elastase, induced emphysema in hamsters, 797
Monoclonal antibody to pro-

teins associated with pig pulmonary surfactant, pulmonary damage induced in mice, 247
Mucociliary clearance, importance of, minireview, 423
Murine gamma interferon effect on the cellular responses to bleomycin in mice, 687

Neutrophil response following intratracheal instillation of collagen peptides into rat lungs, 549
Nitrogen dioxide effects on murine alveolar macrophages, 619

Oxygen tolerance extension:
in man, philosophy and significance, 1035
symposium introduction, 865
Ozone exposure, effects of 2 ppm on rat lung lipid fatty acids, 477
Ozone inhalation, 0.25 ppm effects on the terminal bronchioles of juvenile and adult rats, 225
Ozone-exposed alveolar type II cells isolated from adult rat lung, synthesis of phosphatidylcholines in, is glycerolphosphate acyltransferase a rate-limiting enzyme, 1

Parenchymal strips, pharmacologic responsiveness in the rat, 575
Particle deposition:
effect of lung airway branching pattern and gas composition, background and literature review, minireview, 311
effect of lung airway branching pattern and gas composition, experimental studies in human and canine lungs, 321
Prostacyclin production attenuation in cultured bovine pulmonary artery endothelial cells by phosphodiesterase inhibition, 637
Protein deficiency potentiates oxygen toxicity, 911
Pulmonary limits of oxygen tolerance in man, 897
Pulmonary macrophages:
antimicrobial activity in canine endotoxin shock and lung injury, 359
attraction to inhaled particles through complement activation, 51
proliferation during the early phase of an acute graft-versus-host reaction in mice, 781
Pulmonary metabolism of reactive oxygen species, 959
Pulmonary oxygen toxicity in vitro, cellular interactions, hyperoxia causes adult rat lung fibroblast cultures to produce apparently autocrine growth factors, 403
Pulmonary surfactant system sublethal hyperoxic injury, 1021
Pulmonary vascular reactivity in vitro, effect of hydrogen ion concentration, 837

Red blood cell therapy decreases hyperoxic pulmonary injury, 977

Somatomedin-C/insulinlike growth factor I (Sm-

C/IGF-I) mRNAs during lung development in the rat, 607
Sulfhydryl reagents protective role in oxidant lung injury, 1005
Surfactant-associated proteins:
15-and 35-kDa, concentrated in different organelles in rat lung tissue, 209
hydrophobic, electrophoretic, and immunologic analyses and cellular localization in human lung, 655
Surfactants for replacement therapy, experimental evaluation, minireview, 279

Tracheal goblet cell hyperplasia produced by human neutrophil products, reduced by dexamethasone in the rat, 853
Tracheobronchial mucociliary clearance system, response to repeated irritant exposure, effect of sulfuric acid mist on function and structure, 587

Vascular permeability:
neurally mediated increase in rat trachea, onset, duration, and tachyphylaxis, 757
substance P-induced increase in rat trachea does not depend on neutrophils or other components of circulating blood, 769
